

Marketing Funnel Analysis Dashboard Report

This report presents a comprehensive marketing funnel analysis performed using Power BI on e-commerce customer behavior data. The project focuses on identifying customer conversion drop-offs, evaluating category and brand performance, and providing actionable business recommendations to improve lead-to-customer conversion.

Project Objective

The objective of this project is to analyze customer journey stages from product views to purchases and identify optimization opportunities through interactive dashboard analytics.

Tools & Technologies Used

- Power BI
- Power Query
- DAX (Data Analysis Expressions)
- CSV Dataset
- Data Visualization Techniques

Dataset Overview

The dataset contains customer interaction events including:

- Product Views
- Cart Additions
- Purchases
- Product Categories
- Brands
- User Sessions
- Revenue Information
- Date & Time Data

Dashboard Components

The Power BI dashboard contains:

- KPI Cards
- Funnel Analysis Chart
- Category Performance Donut Chart
- Brand Revenue Bar Chart
- Purchase Trend Line Chart
- Interactive Slicers

Key KPIs

- Total Views
- Total Cart Additions
- Total Purchases
- Conversion Rate
- Total Revenue
- Cart Abandonment Rate
- Brand Revenue Performance

Key Insights

- Significant drop-off exists between product views and cart additions.
- A small number of brands contribute to most purchase revenue.
- Certain product categories dominate customer purchases.
- Cart abandonment remains a major optimization opportunity.
- Conversion rates can be improved through better checkout optimization.

Business Recommendations

- Improve product page quality and descriptions.
- Simplify the checkout experience.
- Retarget abandoned cart users.
- Increase focus on high-performing brands.
- Promote top-performing categories more aggressively.

Skills Demonstrated

- Funnel Analysis
- Business Intelligence
- Data Cleaning & Modeling
- DAX Calculations
- Dashboard Design
- Data Storytelling
- Marketing Analytics

Project Outcome

This project demonstrates the ability to transform raw marketing funnel data into actionable business insights through interactive Power BI dashboards and KPI-driven reporting. It showcases practical analytical skills relevant to Data Analyst, Business Analyst, and Marketing Analytics roles.
